

HILTON

MOBILE DAY CARE CHAIRS

“THE ULTIMATE SEATING SOLUTION PROVIDER”

PRESSURE SORES

What is a Pressure sore? A pressure sore is an injury to the skin and the tissue under it. Sitting or lying in the same position will begin to cut off the flow of blood to that area, blocking oxygen and vital nutrients from maintaining healthy tissue. When the tissue becomes starved for too long it begins to die and a pressure sore starts to develop.

Some of the most common causes of pressure sores apart from long periods of pressure itself are: friction, shear, temperature and moisture. It is difficult to identify any one particular cause of pressure damage as it is often a combination of the above factors.

For those individuals seated for long periods and unable to adjust their position to relieve pressure, the risk of pressure-related problems increases. Accordingly in these circumstances the importance of choosing the most appropriate seating system to ensure correct postural support and pressure care is vital.

THE HILTON'S SIMPLE SOLUTION

So does the Hilton Range cover these issues? Indeed it does. All Hilton Day Care Chairs come with Memory foam seat and legrest, as standard, providing in themselves very advanced pressure relief qualities. Furthermore the Hilton range accommodates for every pressure relieving position, from raised legrest to Tilt-in-Space thereby giving the greatest pressure relieving range possible.

*Areas where body weight is concentrated.
Tilting of chair gives a more even spread of
body weight*

*Normal seating position can cause bad
circulation. Raising legs aids circulation*

TRANSFERS

Not only does the Hilton Day Care Chair range offer all the solutions to pressure relieving and pressure sore prevention, but it also reduces the number of transfers that have to take place – therefore cutting down the client/carer risk considerably and allowing maximum comfort and support

HILTON MOBILE RECLINER DAY CARE CHAIR

Exceptional Comfort and Mobility for a great Mobile Day Care Chair option. The Hilton Mobile Recliner offers exceptional comfort with soft fibre filled waterfall backrest and memory foam seat. This is an excellent Day care chair option enabling clients with low pressure relief needs to be in the greatest comfort and reducing the number of transfers and the use of a wheelchair.

Normal sitting position

Normal sitting position with slide out footplate for portering

In Recline position

Reclining Backrest and Slide out footrest for comfort when resting or in transit

CAREFORM MOBILE POSTURAL SUPPORT CHAIR

The Careform Backrest option can be fitted to any of the Hilton Care Chairs; Recline, Tilt-in-Space or Dual Tilt-in-Space. The Careform backrest has four 'pockets' fitted behind the soft foam layer which allows you to add foam or air inserts behind the back cushion enabling you to conform the backrest to almost any back contour – this backrest coupled with the Hiltons functions and the new 'Hand' lateral gives an enormous amount of comfort and support to persons with very high postural needs.

Functions;
Recline
Tilt-in-Space
Dual Tilt-in-Space

The Pockets in the back can be in-filled with foam or air cells

This enables you to conform the backrest to the clients back contour

NEW
Sept 2011

The latest lateral support has the ability to be curved allowing you to give support whilst holding the client into the chair.
